

PTC Therapeutics' Mary Frances Harmon Named One of the Most Inspiring Leaders in Life Sciences by PharmaVOICE Magazine

August 6, 2020

- Senior Vice President of Corporate and Patient Relations recognized as one of the 100 most inspiring people in the life-sciences industry -

SOUTH PLAINFIELD, N.J., Aug. 6, 2020 /PRNewswire/ -- PTC Therapeutics, Inc. (NASDAQ: PTCT) is proud to announce that its Senior Vice President of Corporate and Patient Relations, Mary Frances Harmon, has been named to PharmaVOICE magazine's annual list of the most inspiring people in the life sciences industry. Mary Frances is recognized for her inspirational qualities, passion and conviction for the industry, and dedication to improving the lives of patients.

"Throughout her tenure at PTC, Mary Frances has consistently served as an inspiration to us, the patients, and their families - performing from a place of genuine care and compassion," said Stuart W. Peltz, Ph.D., Chief Executive Officer, PTC Therapeutics. "With her long and dedicated experience in patient advocacy, she has been vital in establishing and growing relationships with patients, advocacy groups and caregivers so that PTC can better serve the needs of patients. We could not be prouder of Mary Frances and we are all thrilled that she will receive this well-earned recognition from PharmaVOICE."

Mary Frances has over 30 years of experience in the pharmaceutical industry and currently oversees strategic and operational leadership for corporate communications, government affairs, advocacy, and patient communications and engagement, which is essential in PTC's commitment to patient families. Her work helps create a unified vision for patient and government relations and implementing programs with patient groups. During her first year at PTC, Mary Frances launched the Strategies to Realize Innovation, Vision, and Empowerment (STRIVE) awards, which supports initiatives benefitting the Duchenne muscular dystrophy patient community. STRIVE drives innovation and awareness within the medical community and has awarded funding to 28 patient advocacy organizations worldwide.
